Body Bags with Face Identification Window and without Identification Window:

- Sizes Range from Infant to XXL

- Low Density Polyethylene

- 80 Micron & 120 Micron

Infant – 850 x 500mm
Small – 1300 x 750mm
Medium -1700 x 750mm
Large – 2000 x 850mm
XL – 2300 x 850mm
XXL – 2300 X 950mm

BESTMAN

BFW – series Fluid / Blood Infusion Warmer

BFW series Medical Fluid / Blood Infusion Warmer is a kind of device to warm the liquid which will be infused into human body by warming the infusion pipe, with high efficiency and easy use; dry groove warming structure, adopt conventional infusion pipe, no need special consumables.

Features:

- Temperature intellectual controlling technology: warm the device quickly, warm the fluid automatically and control the temperature accurately in the predetermined temperature, safe and stable.
- Color LCD display: real-time temperature, set temperature, environment temperature, dropping speed (10-300 drips/min), warming time, alarm indication, electricity indication, liquid exist indication, wireless access indication.
- Security feature: low temperature alarm & high temperature alarm.
- Infrared sensor technology: audible & visual alarm for finishing infusion.
- Connect the computer by RS – 232 port to control the device.
- Warming structure: dry-groove type, binocular tube warming, faster & better efficiency. Use normal infusion tube, no need special consumables.
- Temperature range: 28°C - 42°C   ± 0.5°C

BFW – 1020 / 1020A / 1020B / 1020C

BFW – 1050 / 1050A / 1050B / 1050C

Features:

- 32-bit high speed microprocessor materializes the high precision temperature control of the 0.1 accuracy.
- Simultaneously displays data logging, recording time and temperature (including set value and present value) on the same screen.
- Monitor 16 incubators connected into 1 computer with Labtech Hub software, with unlimited Data Logging Graphic monitoring for step programmed process of real-time and temperature.
- Touch-screen and color LCD display, easy to operate and read.
- Silent heat extraction motor make the inside of machine temperature uniformity, built-in swing heating function can improve heating efficiency.
- Inner-tempered glass door provides the excellent airtight characteristic and observes the inner sample easily.
- Offer various operating mode, suitable for different environments.
- Temperature range 10°C - 60°C   ± 1°C.

FOETAL MONITORING

FOETAL DOPPLER BF-510

It can detect the Fetal heart, its used for detecting the fetal heart at hospital, clinic, family.

FOETAL DOPPLER BF-510S

It can detect the Fetal heart, LCD display FHR, it's used for detecting the fetal heart at hospital, clinic, family.

FOETAL DOPPLER BF 500 (Audio only)

Detects the foetal heart rate from as early as 12 weeks of pregnancy to full term Can be used in hospital, clinic, home, etc.

FOETAL DOPPLER BF 500+
(Audio & Digital)

FUNCTION :
- Detects the foetal heart rate from as early as 12 weeks of pregnancy to full term.
- Can be used in hospital, clinic, home, etc.
- Displays the Foetal Heart Rate with LCD

FOETAL DOPPLER BF 600
(Audio Only)

FUNCTION :
- Detect Foetal Heart Rate, audio only
- For use from 12 weeks to full-term pregnancy

FOETAL DOPPLER BF 600+
(Audio & Digital Display)

FUNCTION :
- Displays Foetal Heart Rate with LED
- On-Off music function and sound alarm of the FHR when out of range
- Automatic Turn off Function.
- For use from 12 weeks to full-term pregnancy

FOETAL DOPPLER BF-500A

It can detect the Fetal heart, LCD display FHR, Built-in modem, can dial-up directly, can transmit the FHR signal to the monitor centre via a telephone line, it's used for detecting the fetal heart at hospital, clinic, family.

FOETAL DOPPLER POCKET A & B MODELS WITH OPTIONAL VASCULAR DOPPLER PROBE

Sonoline series ultrasonic pocket foetal Doppler can meet the routine examination requirements of obstetricians, midwives and pregnant woman.

Sonoline <u>A</u> is for simple auscultation

Sonoline <u>B</u> is a high performance model with FHR digitial LCD Display.

POCKET FETAL DOPPLER – BABY SOUND A & B FUNCTION :

- Specially designed for home care.
- Detects Foetal heart rate from as early as 10 to 12 weeks.
- Can be connected to the computer, CD or tape recorder for recording the babies heart sound.
- Both A and B models have and audio output socket.
- Baby Sound A is designed for simple auscultation. Baby Sound B integrates a single chip CPU, LCD display and accurate arithmetic software, it can display the FHR and is very convenient to get baby's accurate heart rate.

CARDIOTACOGRAPHS

FOETAL MONITOR POP UP SCREEN – CMS800G

FEATURES:
- Light weight, space-saving, easy to use.
- 8.4" LCD screen, folding 60 degree.
- Display waveforms and digitals simultaneously.
- FHR 120-160 normal area highlight
- 12 hours data and waveform storage and review.
- FHR upper and lower limit alarm.
- Twins monitoring function option.
- High sensitive 9 Elements 1 MHZ Pulse Doppler transducer.
- Built-in PC Network can be connected to the central monitoring system.

FOETAL MONITOR FC 700 CARDIOTACOGRAPH

FEATURES:
- Accurate FHR detection
- High sensitivity (1MHz)
- Automatic foetal movement detection
- A4 size wide chart paper
- Uses inexpensive fax paper
- Intuitive user interface
- Easy to upgrade
- PC interface through RS-232C
- Central monitoring system

TWIN VIEW – COLOUR LCD TWIN FETUS MONITOR - FC 1400

FEATURES :
Superior Data Display.
- 320 x 240 colour LCD viewer.
- Twin capability and automatic fetal movement.
- 12 hours of memory capacity.
Extreme Data Accuracy and Access.
- High Accuracy and wide detection area.
- Easy on-screen access with scrolling function.
- Durable Watertight probes.
Printout.
- Easy-to-read B5 size chart paper.
- High Speed printout of stored data.
- Uses inexpensive fax paper.

HI-CARE DISPOSABLE EXAMINATION GLOVES

Latex Powdered Examination Gloves (S; M; L) - CODE : GLLP

Functional Benefits
-Protection from unwanted or dangerous substance.
-Easy donning and helps prevent roll back.
-Softness provides superior comfort and natural fit.
-Beaded cuff makes donning easy.
-Ambidextrous and straight fingers.

Quality Standards
Conforms to ASTM D3578 (01) and EN455 (00) Standards. - Manufactured under GMP and ISO9001 : 2000 Quality Management System.
Using FDA approved absorbable corn starch.
Extractable protein level is less than 200 microgram/gram, while powder level is below 120 milligram/glove.

Latex Powder-Free Examination Gloves (S; M; L) - CODE : GLLPF

Functional Benefits
- Protection from unwanted and dangerous substance.
- Easy donning and helps prevent roll back.
- Softness provides superior comfort and natural fit.
- Beaded cuff makes donning easy.
- Powder free to eliminate powder-induced irritation and dermatitis to the users.
- Textured surface on palm and fingers provide a better grip.
- Low level of extractable proteins and chemical residue, hence   lower incidences of allergic reactions.

Quality Standards
- Conforms to ASTM D3578 (01) and EN455 (00) Standards.
- Manufactured under GMP and ISO9001 : 2000 Quality Management System.
- Extractable protein level is less than 50 microgram/gram, while powder level is below 2 milligram/glove.

Nitrile Examination Gloves (S; M; L) (Latex & Powder Free) - CODE : GLNPF

Functional Benefits
- Protection from unwanted and dangerous substances.
- Beaded cuff ensures easy donning and prevent roll down.
- Superior strength with better puncture resistant.
- Full textured enhances wet and dry grip.
- Thinner gauge improves tactile sensitivity.
- Custom design enhances comfort and fit.
- Provide an alternative solution for individuals who are allergic to natural rubber latex.

Quality Standards
- Conforms to ASTM D6319 (00) and EN455 Standards.
- Manufactured under GMP and ISO9001 : 2000 Quality Management System.
- Biocompatibility tested or biocompatibility friendly.
- Manufactured from 100% nitrile (Acrylonitrile-butachiene).
- Moisture content is below 0.8% per glove.
- Resists permeation by wider range of chemicals than natural rubber latex of the same thickness.

Vinyl Powder Free Stretchy Examination Gloves (S; M; L) - CODE : GLVP

Functional Benefits

Quality Standards
- Conforms to ASTM D6319 (00) and EN455 Standards.
- Manufactured under GMP and ISO9001 : 2000 Quality Management System.

PALM/Lab Glucometer

CODE: BMPL

includes:

Palm/Lab Meter
10 Palm/Lab Test Strips
One Code Strip
One vial of control solution
One Lancing device x Ten Lancets x Carrying Case
Owners Booklet

Specifications:

Dimension : 75mm x 50mm x 17.5mm
Weight: 42g
Power source: CR2032 3V lithium coin battery x 1
Battery Life: Over 1,000
determinants x Display: Large LCD
External Output: RS232 PC interface
Memory: 180 measurement results with date and time
Auto Electrode inserting detection
Auto sample loading detection
Auto reaction time count-down
Sleeping mode: Power consumption less than 20uA
Auto turn-off after 3 minutes without action
Operating Ranges: Temperature 15 - 30°C -
Relative Humidity 10 – 90% Hematocrit 30 – 60%
Result Range: 30 to 600mg/dL (1.3 to 33.3 mmol/L)
Calibration: Plasma-equivalent x Sample: Fresh Capillary blood
Sample Size: 0.6 microliter
Test Time: 10 seconds

SYRINGE DRIVER SP500, INFUSION PUMP SP800

The SP-800 pump is a highly economical volumetric infusion pump, built for safe and easy operation. Highly accurate infusion rates ensure patient safety and optimum therapeutic effect.

Features :
- Unique door-free design
- LCD Display
- Accurate fluid delivery
- Infusion speed adjustable.
- Built in rechargeable lithium battery.
- Audio alarms: infusion completion, occlusion, air bubble, low battery, control abnormal, installation error, AC power supply

Features:
All standard syringes of10ml\20ml\50ml are compatible.The machine diagnoses the syringe size automatically,and with a simple syringe specification setting,the syringe pump can guarantee an accurate and safe injection.

- Unique function of bedside injection supervision which makes patients and their relatives as well as nurses more assured.
- Excellent injection function and operation. Even small-volume injection is accurate.
- Double CPU system ensures safe and reliable injection process.
- Driven by precision step motor,no pulsating waves shall occur during even low-rate injection.
- Accurate and sensitive pressure sensor detects occlusion pressure accurately.
  Alarms are given in case of malfunction or operation error and the machine stops operation automatically.

PEAKFLOW METER STANDARD – ADULT

PEAKFLOW MOUTHPIECES (100'S)

SPIROMETER CMS-SP10B

FEATURES:

- Ultra-thin design for portable carrying, easy operation for convenient test x Large TFT screen to display the test result clearly
- Measure FVC, PEF, FEV1 etc. parameters synchronously
- Support diagnosis evidence by volume and flow rate chart display
- With precise, credible test result and good consistency
- Built-in predicted value, display the testee current condition by red, yellow and green bar
- Provide repeated measure and memorize the correlative data
- Communication with the computer with the USB (or Bluetooth), which can calculate data, analyse trend and export
- Built-in lithium battery, battery power display X Automatic power-off when there is no operation in one minute.

MAINSTREAM AND SIDESTREAM CO₂/SP0₂ MONITORS

- High performance capnography with either mainstream or sidestream measurement
- Advanced pulse oximetry combining innovative technologies with advanced features
- Application range from infant to adults
- Display of ETCO2, FICO2, SPO2 respiration and pulse rate, canogram and plethysmogram
- For intubated and non - intubated patients
- Maintenance and calibration - free technology
- Small, light - weight and shock - resistant mainstream IRMA CO2 Analyzer
- Low flow sidestream sampling with the new NOMO technology
- Superior performance, easy to use and ergonomic design
- Up to 6 hours battery operation for extended transport time.
  Storage capacity for patient data of up to 400h
- USB interface and PC software
- Up to 16 language versions available
- Key technology accessories ensure reliable monitoring
- Autoclave SoftCap A and other high - quality SPO2, reusable and disposable sensors

SCALE MEG213 – BMI

CODE: SCA213
Features:

This attractive scale with modern style of black tempered glass and blue backlight LCD looks great and easy to read, its beautiful not only outside but also powerful features, Accurate measurement of weight, BMI, and Hydration %and Bone weight.

Capacity
5-180kg.
Increments: 100grams

SCALE HEBE 1 – ADULT FLOOR 150KG

CODE: SCAH1
Features:

High Precision Scale:
minimum display unit is 0.1kg
Calculates and displays user
BMI x Large LCD Screen
Automatically switches off
after 6 seconds.
Can store 4 user height settings
150kg x 100g

SCALE WA100 BODY FAT SCALE SUITABLE FOR DIETICIANS

CODE: SCAWA100
Features/specifications

LCD screen 92 x 51mm x
using high precision.
Strain gauge sensor.
Multifunction: body fat
%, body hydration %,
Body muscle%, body
Bone% and suggest
Calorie intake requirement
Built-in memory for 12
Different users.
Optional normal
weighing mode
(bypassing parameter
Setting): auto step on
weighing and
consecutive add-on Weighings.
Low battery and
overload indication.
Last immediate memory recall
Compare current
result to the last record
Five activity levels
selectable.
150kg, increments 0.1
Interchangeable kgs/lb
Auto-off after 3 seconds.

SCALES

WHEEL CHAIR SCALE – 200KG

CODE: MS5810

100G Increments.
Revolvable arm-rest.
Foldable foot-rest.
Lockable rear wheels.
Medical grade anti-shocking.
caster wheels.
RS232 data tranmit to PC.
Non slippery seat.
Easy to use 5 operation keys.
Extreme large LCD display.
BMI function.
HOLD function for weight lock.
Tare function for weight taring.
Compact size packaging.

SCALE MS3200

CODE: SCA3200

300kg x 100g
0.1g increments
Features:
More than just precision and
quality, characterized by
ample platform space
and carefully polished
edges to edges
to ensure the weighing
comfort of patients
and health enthusiasts.

SCALE MS3400 ADULT DIGITAL SCALE WITH HEIGHT ROD & BMI

CODE: SCA3400

Features:
Is the ideal scale for
Physicians offices,
weight loss clinics, health
fitness centers and other
medical practices.
Capacity: 300KG X 100G
increments
Height Rod: 2m in FT and CMS

SCALE SLIDING WEIGHT

CODE: SCASWHC

FEATURES:
This scale is widely applicable
for use in enterprise, schools,
hospitals, clinics and sports
departments.
Capacity: 200kg / 100g

VISUAL ELECTRONIC AND SPO2

Specifications:

Dimensions: 88mm (L) x 60mm (W), 18mm (H)
Portable and convenient to operate
Based on latest piezo sensor technology
Power Electronic amplify the sound up to a
maximum of 32 times 16 steps programmable
volume setting. Sound model: Heart and Lung
Frequency Response: 20Hz – 20,000Hz
Real-time record and display of heart rate
and ECG TFT Colour LCD display
(160 x 128 pixels)
Accommodates, infant, pediatric and
adult patients 4.2V
Rechargeable Lithium battery
Automatic switch off after 3 minutes
from last button activation.
An external oximeter probe can be
connected (optional) Pulse sound.
Alarm function for SPO2 and
Pulse Rate USB Port

CODE: STHMF/S

MULTI-FUNCTIONALAND SPO2

Specifications:
Integrated with regular stethoscope,
ECG waveform display, heart rate
and pulse oximeter.
Large LCD Screen Display: 160 x 96;
LED back light RS232 Interface
connection to computer
Changeable SPO2 Sensor the different patient
(neonate, infant and adult)
Freeze Function: Convenient to observe
the heart rate, ECG and SPO2.
Real-time display of the heart
rate, ECG and SPO2. Low power consumption,
Long life battery. SPO2 optional -
Weight: 200g Power: 3.6V (Li-ion),
Current: ≤20MA Operation: ± 40 hours
Automatic shutt off after 4 min.
LCD Display: Piexel 160 x 96 - Display
Zone: 60 x 34mm ECG Waveform rolling speed:

ANAND FOOT

CODE: SSAF
Features:

Efficient piston pump for creating vacuum instantly. Engineered plastic moulded parts that are non-corrosive Easy to dismantle, clean, disinfect and reassemble. Portable and non-tiring pedal unit with top view manometer making it easily visible to the operator. Bacterial filter (0.3 micron) with reusable / auto clavable housing between jar and pump. Ease of operation (one person can operate unaided). Also useful for field hospitals, midwives, medical centre, mines, aircraft, trains, mountaineers, onfoot paramedics, etc.

ASPIRET

CODE: SSAF
Features:

Efficient piston pump for creating vacuum instantly. Engineered plastic moulded parts that are non-corrosive. Easy to dismantle, clean, disinfect and reassemble. Portable and non-tiring pedal unit with top view manometer making it easily visible to the operator. Bacterial filter (0.3 micron) with reusable/ autoclavable housing between jar and pump. Ease of operation (one person can operate unaided). Also useful for field hospitals, midwives, medical centre, mines, aircraft, trains, mountaineers, on-foot paramedics, etc

SURGICAL SUCTIONS

ASKIR 20

CODE : SSASK20
FEATURES :
- Easily transportable from one hospital ward to another, particularly suitable for tracheotomized patients, minor surgical applications and postoperative therapy at home.
- To be used for aspirating body fluids such as mucus or catarrh.
- Easily portable equipment designed for non continuous use 30 min. ON / 30 min. OFF, thanks to an electronic system for managing the electricity supply.
- A series of LED's on the front control panel signals whether the machine is operating.
- Made of highly heat resistant, electrically insulated plastic material in conformity with the latest European safety standards.
- Supplied with a polycarbonate 1- litre autoclavable vessel complete with overflow valve .
- Equipped with aspiration regulator, located on the front panel.

ASKIR 30

CODE: SSASK30
FEATURES:
- Easily transportable from one hospital ward to another, particularly suitable for tracheotomized patients, minor surgical applications and postoperative therapy at home.
- To be used for aspirating body fluids such as mucus or catarrh.
- Easily portable equipment designed for non continuous use 120 min. ON / 60 min. OFF thanks to an electronic system for managing the electricity supply
- A series of LED's on the front control panel signals whether the machine is operating.
- Made of highly heat resistant, electrically insulated plastic material in conformity with the latest European safety standards
- Supplied with a olycarbonate 1- litre autoclavable vessel complete with overflow valve Equipped with aspiration regulator, located on the front panel.

ASKIR 30 12V

CODE: SSASK3012
FEATURES:
- Electric Suction unit can operate off 12V DC vehicle power through use of a cable.
- Easily transportable
- Suitable for tracheomized patients, minor surgical applications, nasal aspiration, oral aspiration and tracheal aspiration of body fluids.
- High Vacuum/High flow

ASKIR BR36

CODE: SSASKBR36
- Askir 36BR is a desk-type electrical suction unit for the aspiration of body liquids, oral, nasal and tracheal aspiration in adult or children.
- The appliance is designed for easy transport and almost continuous use.
- The unit is operated by means of an electronic power management system, also monitoring the internal battery operation and status.
- A LED system positioned on the front panel indicated appliance start-up and battery charge status.
- The unit is equipped with suction regulator on the front panel and polycarbonate autoclavable jar complete with overflow valve. Thanks to these characteristics and to its functions, this device is particularly suitable for different applications: utilization in hospital wards, for tracheotomy, for suction of body liquids and for minor surgery.

ASKIR 230

CODE: SSASK230
FEATURES:
- Mixed power supply 230V AC and 12VDC.
- Easily transportable
- Suitable for tracheomized patients, minor surgical applications, nasal aspiration, oral aspiration and tracheal aspiration of body fluids.
- A series of LED on the front control panel signals whether the machine is operating, as well as the charge and recharge status of the batteries.

ASKIR 30C

- Easily transportable from one hospital ward to another, particularly suitable for tracheotomized patients, minor surgical applications and postoperative therapy at home.
- To be used for aspirating body fluids such as mucus or catarrh.
- Easily portable equipment designed on stand with mobile castor wheels. Intermittent duty cycle at 35°C and 110% operating voltage, 120 min ON / 60 min OFF.
- A series of LED's on the front control panel signals whether the machine is operating.
- Made of highly heat resistant, electrically insulated plastic material in conformity with the latest European safety standards.
- Supplied with a polycarbonate 2 x 2 litre autoclavable vessel complete with overflow valve
- Equipped with aspiration regulator, located on the front panel.

HOSPIVAC 350

CODE : SSH350

FEATURES:
- Easily transportable from one hospital ward to another
- To be used for aspirating. body fluids such as mucus or catarrh and/or blood
- Easily moveable by means of wheels under the unit and a handle on top allowing virtually continuous use Continuous use can be
- enabled by activating the illuminated switch.
- Made of highly heat resistant, electrically insulated plastic material in conformity with the latest.
- European safety standards Supplied with two polycarbonate 2-litre autoclavable vessels complete with overflow valve.
- Equipped with aspiration regulator, located on the front panel.

HOSPIVAC 400

CODE : SSH400

FEATURES:
- Easily transportable from one hospital ward to another.
- To be used for aspirating body fluids such as mucus or catarrh and/or blood
- Easily moveable by means of wheels under the unit and a handle on top allowing virtually continuous use
- Continuous use can be enabled by activating the illuminated switch.
- Made of highly heat resistant, electrically insulated plastic material in conformity with the latest European safety standards
- Supplied with two polycarbonate 2- litre auto clavable vessels complete with overflow valve.
- Equipped with aspiration regulator, located on the front panel.

MAMILAT BREAST PUMP

CODE : SUSCBP

FEATURES :
- Easily transportable from one maternity ward to another, or for use at home.
- To be used for aspirating mother's milk.
- Easily portable equipment designed for non continuous use 20 min ON / 40 min OFF.
- Made of highly heat resistant, electrically insulated plastic material in conformity with the latest European safety standards
- Supplied with a polycarbonate vessels complete with teats and nipple shields.
- Equipped with aspiration regulator, located on the front panel.

SYRINGE DESTROYER – BD-300C

CODE: SYRDST

The disposable syringe destroyer is easy to operate and safe and only requires 6V of working voltage to protect patients from infection from used syringes.

Features:

Power: 220V/110V AC, 50/60Hz, <130W

The equipment uses the silver-pole with low voltage (about 7 V.A.C) to melt the needle conveniently and quickly within three seconds

No pollution, only producers a small amount of waste

To Operate: First turn on the power, squeeze the residue liquid out from the syringe body, put the needle directly into the needle melting hole firstly for melting the needle, and then, press the syringe body downward directly until a hole is punctured into the syringe.
